SUMMARY

I am a third-year B.Tech Information Technology student at JSPM University, Pune. I possess strong research and communication skills, and I am actively seeking a software engineering internship opportunities. My aim is to apply my foundational computer science knowledge, problem-solving skills, and eagerness to learn to real-world projects

EXPERIENCE

Student

JSPM University Pune 08/2023 Pune, Maharashtra, India

Information Technology, 3rd Year

- Participated in coding events, hackathons, or technical clubs
- Collaborated with peers on academic projects, presentations, and research-based assignments
- Developed strong communication and presentation skills through seminars and group work

EDUCATION

Bachelor of Technology (B.Tech)

JSPM University 08/2023 Pune, Maharashtra, India

LANGUAGES

English Native Marathi Native

Hindi Native

INTERESTS

Interest in Software Engineering and Development

Areas of interest include software engineering, data structures and algorithms, web development, and systems design

SKILLS

Data Structures	OOP	C/C++	Java
Python	JavaScript	HTML	React
Node.js	Basic SQL	Git	GitHub
Visual Studio Code	Linux	Modular	

PROJECTS

Vidzo — React.js, Node.js, Express.js, MongoDB, Socket.io

Date period

Brief one-line description of the project impact or purpose

- Implemented **secure video upload, streaming, and playback modules**, enabling seamless content delivery and improved user engagement.
- Utilized **efficient data handling and REST APIs** to build a scalable system capable of managing large media files and user interactions.
- Followed a **Git-based development workflow**, maintaining clean, modular, and well-documented code to ensure maintainability and collaboration.
- Developed a **responsive frontend using React.js** to provide smooth navigation, video browsing, and playback experience across devices

Slotify — Online Ticketing Platform

Date period

Developed a web-based ticket booking system that enables users to search, book, and manage tickets efficiently through a user-friendly interface.

- Implemented **ticket search, booking, and seat selection modules** to streamline the reservation process and improve user experience.
- Designed and integrated **RESTful APIs** to handle user authentication, booking management, and transaction processing.
- Developed a **responsive frontend using React.js** to ensure smooth navigation and real-time booking updates.

Micro-Controller : ESP36

Date period

Academic Mini Projects

- Implemented basic data structures such as arrays, linked lists, stacks, and queues using C/C++
- Built small console-based or web-based applications to practice OOP and database integration
